# Child Nutrition Action Plan Worksheet

## Introduction

We want to help you plan how to put one or more of these programs into action in your community! Use this worksheet and program one-pagers to identify key steps to implement or expand these programs in your area.

**Part 1** asks you to think about the current context in which you work, be it at an organization, in a specific program, or as a member of your community.

- What needs are there to address?
- Who would that help or impact?
- What resources are already at your disposal?
- What results are you hoping to achieve?

**Part 2** has you review all the programs, their parameters, benefits, and ways to implement. Think about which of these programs would help address the need you identified in part 1.

**Part 3** offers some questions for you to reflect on to better understand how the programs intersect with the context you identified and how to strengthen your approach.

- What program implementation will best help you achieve your desired result?
- Who are your partners and stakeholders in this implementation?
- What data and feedback are you using to support the conclusions you've made?
- How will you incorporate community voices?

**Part 4** gives you an opportunity to choose three action items for program exploration and/or implementation, work through what is needed to execute them, and when that action will occur.

Contact your Hunger Free Oklahoma regional office using the info in Part 4 for help with implementation. **Let's take action to end childhood hunger together!**

**Part 1** Fill in the chart below based off your organization’s mission, a particular program, or area you would like to focus on.

<p>What needs have you identified in your community? How did you identify them?</p>	
<p>What resources and assets do you have access to?</p>	
<p>What is your desired result or outcome?</p>	
<p>Who will be impacted if you achieve your desired result or outcome?</p>	

**Part 2** Review the Child Nutrition program one-pagers and think about how each program could help address the needs above.

**Part 3** Reflect on the questions below.

What program(s) will best help you achieve your desired result?

Who are your partners and stakeholders (internal & external)?

What data and/or feedback are you using to support this pathway?

How will you incorporate the voices of children, parents, and caregivers?

**Part 4** Select a program and three action items to focus your action plan around. Construct your plan by filling out the chart below. Repeat for each program you'd like to work on.

<b>PROGRAM:</b>	<b>Expected Results (How to Measure)</b>	<b>Timeline (Start/Finish)</b>	<b>Assistance Needed</b>	<b>Budget (Optional)</b>
Action 1:				
Action 2:				
Action 3:
